-

Technician will leave you with a checklist indicating the condition of your door system and advise you of any needed repairs. Some repairs not included above may require additional labor charges, such repairs only performed with customer's approval. Parts not indicated as being supplied above are extra.

NOTE: An ANNUAL inspection performed by an experienced, trained door systems technician is recommended to keep your door operating safely, although you should conduct monthly safety checks and provide regular limited maintenance to your garage door system.

INCLUDES Garage Door Safety & Maintenance Guide and Safety Poster
