

Valance Style Chart

The valance binding or trim gives an accent to the edging of your retractable awning fabric. Here are three of the most popular ways our customers pick their valance styles: 1. Some customers when choosing a darker sold fabric pick a lighter valance color like white or linen to highlight their fabric. 2. Others Customers like matching the color of their binding to their awning fabric to produce a blending effect . 3. When customers pick a striped fabric many times they like to pick a valance color that matches a color in the fabric stripes.
