SCREENS

THE MOST VERSATILE GARAGE SCREEN ON THE PLANET

SCREEN OPTIONS

STANDARD SCREEN	SUPERSCREEN
<ul style="list-style-type: none"> • 18 x 14 • Fiberglass • Black only • Dip coated after weaving 	<ul style="list-style-type: none"> • 17 x 20 • PVC Coated Polyester • White or Black • Extruded protective coating prior to weaving

WHITE PRIVACY FROM OUTSIDE

WHITE PRIVACY FROM INSIDE

- **Privacy with One-Way Visibility** – the tight weave inhibits visibility from the outside while offering a clear view from the inside – daytime privacy without blocking the view or airflow! ****WHITE SUPERSCREEN offers significantly more privacy than BLACK SUPERSCREEN****
- **Additional Insect and Pest Protection** – The 17x20 weave prevents the tiniest of insects, including no-see-ums, from passing through the SuperScreen
- **Pet Damage Control** – Far better protection from pet damage than fiberglass screen with increased resistance to punctures, cracks and tears
- **Extended Durability and Protection** – Virtually unaffected by sun exposure and age and 3x stronger than fiberglass screen, the PVC coated polyester retains original luster of a 'new screen' year after year. *After a 7 yr weathering test, SuperScreen lost only 1% of original strength.*
- **Excellent Solar Protection** – blocks up to 80% of the sun's harmful ultra-violet rays that produce bright sunlight glare, heat and damage to furnishings
- **Blocks Heat Without Blocking the Breeze** – breezes flow through without the heat resulting in a cooling effect
- **Wind Damage Control** – The SuperScreen holds up to strong winds and the flexibility, tensile strength and tear resistance of the SuperScreen causes wind blown debris to bounce off
- **Mildew Resistant** – biocide is compounded directly into extrusion coated yarn to resist mildew, bacteria and fungus growth
