SUPERIOR

Series 5H Horizontal Commercial **Pipe Aluminum Railing**

Meets OSHA, ADA, and BOCA safety criteria

Superior Series 5H Horizontal Commercial Pipe Railing is designed to utilize all the advantages of aluminum, where strength, durability, and no-paint maintenance are key.

Components are easily assembled without welding by using mechanical fasteners at intersections, and epoxy structural adhesive at splice joints.

Superior Pipe Railing is factory-assembled and made to your exact specifications. Special curves or pipe radii can easily be fabricated to fit your needs. This results in further on-site fabrication savings, and makes a practical, sound investment for the budget-minded buyer.

Pipe railing is available in standard heights of 32", 36", 42", and 48", as well as custom heights.

Concealed Fasteners

Posts and top rails for Pipe Railing are assembled to run in continuous lengths via concealed fasteners. Not only is this system stronger than one with cast tee and cross connections, but it also provides a contemporary design.

Handrail

In addition to a guardrail system, Series 5H Horizontal Commercial Pipe Railing can also be used in handrail applications. Pipe handrails can be directly mounted on walls, stairways, or other barriers. Additionally, handrail can be mounted to Superior Pipe Picket, Heavy-Duty, Cable, and Architectural Railings.

Code requirements call for guardrails and handrails to be at differing heights in public applications. Due to the compatibility with other product lines, Superior Pipe Handrail allows most Superior systems to comply with these regulations without compromising design or aesthetics.

Finishes

Series 5H Commercial Pipe Railing is available in baked-on enamel, anodized, and duranodic finishes.

Series 5H Applications

A sampling of the numerous applications for Series 5H Railing

Municipal Settings

Water treatment plants, village offices, city parks, etc.

Athletic Venues

As handrail, guardrail, or both!

Commercial Buildings

Breweries, churches, stores, restaurants, hospitals, etc.

Multi-Family Buildings

Apartments, condos, hotels, motels, etc.

SUPERIOR Series 5P Pipe Picket Aluminum Railing

Meets OSHA, ADA, and BOCA safety criteria

Superior Series 5P Pipe Picket Railing utilizes many of the same components as Series 5H Horizontal Pipe Railing, but with the added aesthetic, structural, and code advantages offered by pickets. Similar to the system's other components, these pipe pickets are made of high quality, maintenance-free aluminum extrusions.

Series 5P Pipe Picket Railing is easily assembled without welding, with joints fastened by a combination of fasteners and epoxy splices, all stylishly concealed. Furthermore, pipe pickets are assembled with a tight drive-in-fit to ensure rigidity.

Each pipe picket project is pre-assembled in house to the exact needs of the project. Field fabrication is minimal...saving time and money on the jobsite!

Pipe picket railing is available in standard heights of 32", 36", 42", and 48", and other custom heights upon request. These standard sizes act as a guideline to ensure code requirements are met.

Handrail Compatibility

Due to their similar components, Series 5P Railing makes for a great companion to Series 5H Pipe Handrail. The nature of pipe picket railing allows for it to be classified as a guard rail, which, in conjunction with some properly placed handrails, creates a system that is as beautiful as it is code compliant!

Design Options

Pipe picket railing can be utilized in a large variety of ways. From balconies to entryways to ramps, Series 5P Pipe Picket Railing has a design option that will get the job done right.

Finishes

Series 5P Pipe Picket Railing is available in baked-on enamel, anodized, and duranodic finishes.

Series 5P Applications
